

Action plan submitted by Aygün TANRIKULU for Yalova Abdülhamid Han Ortaokulu - 26.01.2021
@ 13:54:02

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.
- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.
- › It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at www.esafetylabel.eu/group/community/protecting-your-devices-against-malware.

Pupil and staff access to technology

- › It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.
- › Ensure that the policy on mobile phones is being applied consistently throughout the school. Take a look at the fact sheet on Using Mobile Phones at School (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).

Data protection

- › There is a retention plan in place for your school detailing how specific school records are stored, archived and disposed. This is very good. Ensure that the plan is followed and review it regularly to ensure it relates to the Data Protection Act and other relevant legislation. Check the according fact sheet for more information.
- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.

Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.

IT Management

- › It is good that staff members with questions about software issues can contact a school helpdesk. Consider whether you need to provide training and/or guidance to new software that is installed on school computers. This is important to ensure that school members will take advantage of new features, but also that they are aware of relevant security and data protection issues.

Policy

Acceptable Use Policy (AUP)

- › It is excellent that eSafety is an integral part of several school policies. Do all staff make reference to it when appropriate through their teaching? Look for examples of good practice and share these with staff and pupils. Produce a short case study to highlight this good practice and upload it to your profile on the eSafety Label portal via your [My school area](#) as inspiration for other schools.
- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylabel.eu/group/community/acceptable-use-policy-aup-.

Reporting and Incident-Handling

- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › It is good practice to log cyberbullying incidents that occur in your school centrally, as you are contributing to building a data base of successful incident handling practices from schools across Europe that you and others can use in future. Make sure that pupils sign up to anti-bullying guidelines in your Acceptable Use Policy.

Staff policy

- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.
- › Ensure that all staff, including new members of staff, are aware of the policy concerning online conduct. This should be a topic that is regularly discussed at staff meetings and clearly communicated in the School Policy, and

to staff and pupils in the Acceptable Use Policy. Regularly review and update both documents as necessary.

Pupil practice/behaviour

- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.

School presence online

- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetymal.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › Regularly check the content of the school's online presence on social media sites to ensure that there are no inappropriate comments. Set up a process for keeping the site/page up to date, and check the fact sheet on Schools on social networks (www.esafetymal.eu/group/community/schools-on-social-networks) for further information to make sure that good practice guidelines have been followed. Get feedback from stakeholders about how useful the profile is.

Practice

Management of eSafety

- › It is good that you have a designated member of staff responsible for eSafety. Consider whether it would be helpful to have an eSafety committee comprising members from all groups of stakeholders. Ensure that this person is involved in the development and regular review of your School Policy. She or he should not only be informed, but should also fill out the Incident handling form whenever an incident arises at www.esafetymal.eu/group/teacher/incident-handling.
- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy www.esafetymal.eu/group/community/school-policy.
- › In addition to a clear designation of responsibility to ensure that all necessary network security and user privacy checks are in place, it is essential that schools also have audit and procedural checks at regular intervals. Without this, a school will be leaving itself vulnerable. See our fact sheet on School Policy at www.esafetymal.eu/group/community/school-policy.

Although there should always be an overall lead person on eSafety just as you have in your school, everybody in the school has a shared responsibility to secure any sensitive information used in their day to day professional duties. Even staff not directly involved in data handling should be made aware of the risks and threats and how to

minimise problems. Use our fact sheet Acceptable Use Policy

(www.esafetylevel.eu/group/community/acceptable-use-policy-aup-) to ensure that everyone plays their part in ensuring they are all the best and safest digital citizens they can be.

eSafety in the curriculum

- › It is commendable that you are able to provide an eSafety curriculum that keeps up with emerging issues. Continue to make use of new resources as they are made available. Can you upload to your school profile an outline of how you design the curriculum and links to some of the resources you use – this would be most helpful for other schools.
- › It is very good that, in your school, pupils are taught from an early age on about responsibilities and consequences when using social media. Please share any resources through the uploading evidence tool, accessible also via the [My school area](#).
- › It is excellent that consequences of online actions are discussed with pupils in all grades. Terms and conditions need to be read to fully understand contractual conditions. This can also concern aspects of data privacy. Another important topic is breach of copyright. Please share the materials used through the uploading evidence tool, accessible also via the [My school area](#).
- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetylevel.eu/group/community/embedding-online-safety-in-curriculum.

Extra curricular activities Sources of support

- › It is good to know that other school services are involved in eSafety issues (e.g. counsellors, psychologists, school nurse). Are they also invited to contribute to developing and regular review of your School Policy? Publish a case study about how this is managed in your school on your school profile page on the eSafety Label project website, so that others can learn from your experience.

Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?
- › It is good practise that you provide information to teachers on the technology used by pupils in their freetime. This is important as this awareness is the first step in addressing the issue of powering down for school. At the same time pupils should not be asked to do their homework using technology not available to them outside of schools. You might want to have a look at the [Essie Survey of ICT in schools](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the

Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
